

(a) Reading a concept is not the same as controlling it

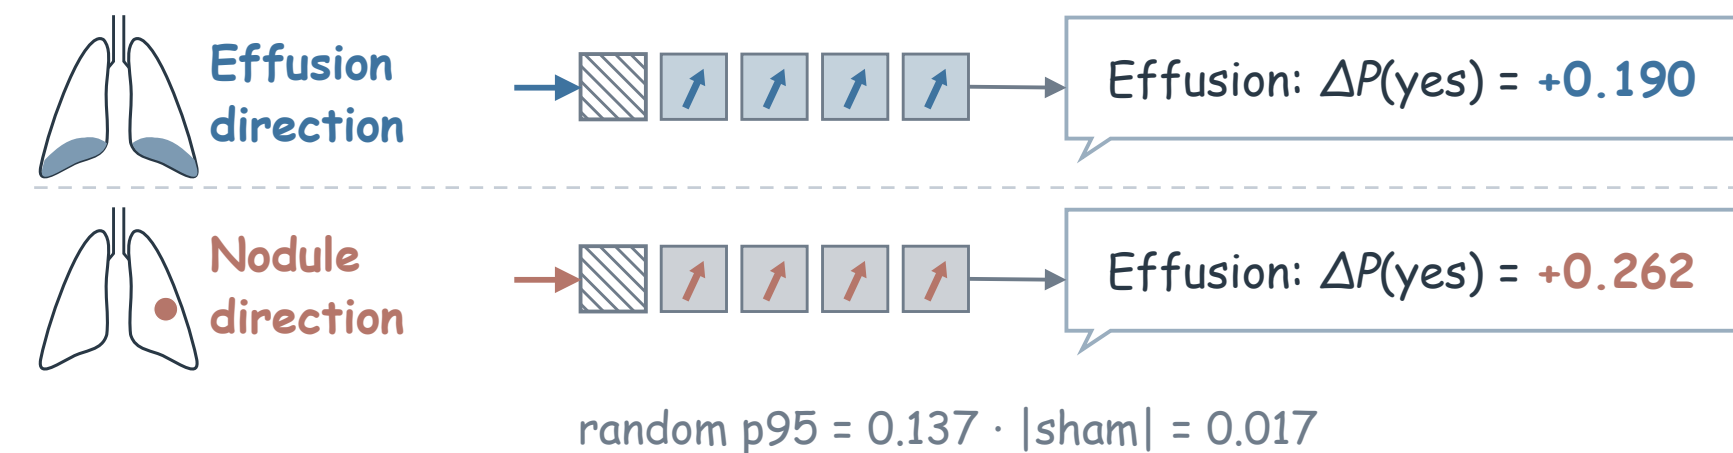

(b) Ownership: does the concept's own direction win?

All required; competitor contrasts use simultaneous 95% max-T bounds.

Same Effusion question, different writes

Qwen2.5-VL-7B · NIH ChestX-ray14

✓ Above controls

✗ Not owned: Nodule moves it more
 $O_q = -0.071 \cdot 95\% \text{ CI } [-0.080, -0.062]$
